TEST STRATEGY

For Greenfield Local Hub

16 MARCH 2026

GREENFIELD LOCAL HUB

Date of test	Component to be tested	Type of test to be carried out	Prerequisites and dependencies
2026-03-13	Navigation Bar	Black box - Functional: Integration testing	Navigation bar fully implemented. All linked pages (Home, Privacy, Products, Producer Dashboard, Loyalty Reward, Account) exist and are accessible. Supported browser and stable network connection required. No broken links in staging environment.
2026-03-13	User Registration Form	Black box - Functional: Input validation and boundary testing	Registration page accessible. No duplicate test accounts. Test data for usernames, emails, and passwords prepared. Browser supports JavaScript and cookies. Network stable. Form validation implemented. Example Test Data: • Normal: Email: sarah@email.com, Password: SecurePass123! • Erroneous: Email: notanemail, Password: 123 • Extreme: Password exactly at minimum length
2026-03-13	Login Functionality	Black box - Functional: Authentication testing	Test account exists with known credentials. Browser supports cookies/sessions. Login page accessible. Password hashing/authentication operational. Stable network connection.
2026-03-13	Products Page	Black box - Functional: Data display & usability testing	Products loaded in database with names, prices, availability, and categories. Filters/search implemented. User account access available if required. Browser

			supports CSS/JS rendering. Stable network.
2026-03-13	Order Placement	Black box - Functional: End-to-end testing	User logged in. Products available in stock. Shopping cart implemented. Payment gateway accessible (mock/test environment). Browser supports JavaScript and cookies. Delivery/collection options configured.
2026-03-13	Producer Dashboard	Black box - Functional: CRUD operations testing	Producer account exists with products listed. Dashboard accessible with correct permissions. Browser supports JS/CSS. Database connected. Network stable.
2026-03-13	Privacy Page	Black box - Functional: Content verification & accessibility testing	Privacy page implemented with correct text content. Browser supports CSS/JS. Accessibility standards (ARIA labels, colour contrast) applied. Network functional
2026-03-13	Loyalty Reward Page	Black box - Functional: Data display & calculation testing	User account with loyalty points exists. Rewards system implemented. Browser supports JS/CSS. Stable network. Points calculation logic functional.
2026-03-13	Account Management	Black box - Functional: Update user details & security testing	User logged in. Profile page accessible. Browser supports forms and JS. Network stable. Test data for profile updates ready.
2026-03-13	Product Quantity Adjustment	Black box - Functional: Input validation testing	User logged in. Cart populated with products. Quantity limits known. Browser supports JS. Network stable. Stock levels preloaded in database.
2026-03-13	Product Search	Black box - Functional: Usability & accuracy testing	Products preloaded in database with diverse names/categories. Search bar implemented. Browser supports

			JS/HTML5. Network stable.
2026-03-16	Category Filter	Black box - Functional: Filtering logic testing	Products categorized correctly in database. Filter function implemented. Browser supports JS/CSS. Network functional.
2026-03-16	Checkout Process	Black box - Functional: End-to-end testing	User logged in. Cart populated. Payment gateway accessible (test mode). Delivery/collection options configured. Browser supports JS/CSS. Network stable.
2026-03-16	Payment Validation	Black box - Functional: Input & processing testing	Checkout page accessible. Test payment cards ready. Browser supports secure connection (HTTPS). Network stable. Payment processing logic operational.
2026-03-16	Order History	Black box - Functional: Data verification testing	User logged in. Previous orders exist. Browser supports rendering order history. Database accessible. Network stable.
2026-03-16	Order Cancellation	Black box - Functional: Business logic testing	User has active orders. Cancellation feature implemented. Browser supports JS/CSS. Database updated in real-time. Network stable.
2026-03-16	Stock Level Management	Black box - Functional: CRUD testing	Producer logged in. Products listed in dashboard. Database accessible for updates. Browser supports JS/CSS. Network functional.
2026-03-16	Product Details Update	Black box – Functional testing	Producer logged in. Product exists. Browser supports form inputs. Database connected. Network stable.
2026-03-16	Image Upload	Black box - Functional: Input validation testing	Producer dashboard accessible. Browser supports file upload. Server accepts image formats (jpg, png).

			Network stable. File size within limits.
2026-03-17	Responsive Layout	Black box - Usability & UI testing	Website accessible on mobile, tablet, desktop. Browser viewport simulation or physical devices ready. Network stable. All pages deployed.
2026-03-17	Colour Contrast	Black box – Accessibility testing	Pages implemented. Colour contrast measured (e.g., WCAG 2.1). Browser supports CSS rendering. Network stable.
2026-03-17	Font Consistency	Black box - UI testing	All pages implemented. Browser supports fonts (Segoe UI). Network stable.
2026-03-17	Error Messages	Black box – Functional testing	Forms implemented. Browser supports JS validation. Network stable. Test invalid inputs prepared.
2026-03-17	Accessibility Navigation	Black box – Accessibility testing	Keyboard navigation supported. All interactive elements reachable via tab. Browser supports keyboard events. Network stable.
2026-03-17	Password Reset	Black box – Functional testing	User account exists. Password reset system implemented. Test email ready. Browser supports forms. Network stable.
2026-03-17	Notifications	Black box – Functional testing	Notification's system implemented. Browser supports real-time updates. Network stable. Test accounts prepared.
2026-03-17	Security: SQL Injection	Black box – Security testing	Forms accessible. Input sanitization implemented. Test database ready in staging. Browser supports form input. Network stable.
2026-03-17	Security: XSS	Black box – Security testing	Forms accessible. Input validation implemented. Test scripts ready. Browser supports JS. Network stable
2026-03-17		Black box – Accessibility testing	ARIA labels implemented. Screen reader software

	Accessibility: Screen Reader		installed. Browser compatible. Network stable.
2026-03-17	Logout Functionality	Black box – Functional testing	User logged in. Logout button implemented. Browser supports session handling. Network stable.
2026-03-19	Data Persistence	Black box - Functional: Data storage verification testing	User logged in. Actions performed (e.g., order placement, profile update). Database connected and accessible. Browser supports cookies/sessions. Network stable.
2026-03-19	Account Deletion	Black box - Functional: User lifecycle testing	User logged in with existing account. Account deletion feature implemented. Browser supports form submission. Database updates enabled. Network stable.
2026-03-19	Multiple Users	Black box - Performance/Functional: Concurrency testing	Multiple test accounts created. System supports simultaneous logins. Database connected. Browser sessions isolated. Network stable.
2026-03-19	Session Timeout	Black box - Security/Functional testing	User logged in. Session management implemented. Browser supports cookies/sessions. Timeout duration configured. Network stable.
2026-03-19	Discount Application	Black box - Functional: Business rule validation testing	Products available. Discount logic implemented. User logged in with cart items. Browser supports JS/CSS. Network stable.
2026-03-19	Filter by Availability	Black box - Functional: Filtering logic testing	Products in database with stock availability status. Filter implemented. Browser supports JS/CSS. Network stable.
2026-03-19	Bulk Order	Black box - Functional: Quantity handling testing	User logged in. Products available in sufficient stock. Cart supports high quantities. Browser

			supports JS. Network stable.
2026-03-19	Search Auto Suggestions	Black box - Usability: Predictive search testing	Products loaded in database. Search bar implemented with suggestion logic. Browser supports JS. Network stable.
2026-03-19	Dashboard Analytics	Black box - Functional: Data visualization testing	Producer logged in. Sales/orders data available in database. Dashboard analytics module implemented. Browser supports charts/JS libraries. Network stable.
2026-03-19	Download Invoice	Black box - Functional: File generation testing	User logged in with completed orders. Invoice generation implemented (PDF/print). Browser supports file downloads. Network stable.
2026-03-20	Email Confirmation	Black box - Functional: Email verification testing	User registration or order action triggers email. Test email accounts available. Email service configured. Network stable.
2026-03-20	Multi-language Support	Black box - Usability/Functional testing	Language switch implemented. Translated content available. Browser supports language switching. Network stable.
2026-03-20	Back-end Database integrity	Black box - Data consistency testing	Database connected. CRUD operations implemented. Test transactions performed. No direct database corruption. Network stable.
2026-03-20	Load Testing	Black box – Performance testing	Multiple simulated users available via testing tools. Server deployed on staging environment. Network stable. Monitoring tools enabled.
2026-03-20	Page load speed	Black box – Performance testing	Website deployed in staging. Browser developer tools available. Network stable. All pages accessible.

2026-03-20	Broken Links	Black box - Functional/UI testing	All pages deployed. Navigation links implemented. Browser supports hyperlink navigation. Network stable.
2026-03-20	Order Status Updates	Black box - Functional: Workflow testing	Orders exist in database. Status update logic implemented (processing, shipped, completed). User logged in. Browser supports JS. Network stable.
2026-03-20	Review/Feedback Submission	Black box - Functional: Form submission testing	User logged in with completed order. Review form implemented. Browser supports form input and JS validation. Network stable.
2026-03-20	Mobile Navigation Menu	Black box - Usability/UI testing	Website accessible on mobile viewport. Responsive navigation implemented (hamburger menu). Browser supports CSS/JS. Network stable.
2026-03-20	Cart Persistence	Black box - Functional: Session data retention testing	User logged in. Products added to cart. Session management implemented. Browser supports cookies/local storage. Network stable. Database connected.
